

PRESS RELEASE

Suedwolle Spring/Summer 2026 weaving collection

A tribute to Italian elegance with "Postcards from Italy"

Nuremberg, Germany, September 2024 – Suedwolle Group announces the launch of its Spring/Summer 2026 collection, "Postcards from Italy." This exquisite new range of weaving yarns offers a journey through the heart of Italian elegance, paying homage to the rich tradition of Italian fashion and craftsmanship. The Suedwolle collection is a celebration of the country's timeless style, merging Italy's heritage with the spirit and quality that have made Suedwolle Group, with its German roots, a leading yarn producer in the textile industry.

Collection highlights

Designed to capture the essence of Italian artistry, "Postcards from Italy" invites you to explore the beauty of wool, reimagined for the modern era. Each yarn is crafted with precision, reflecting the company's dedication to sustainability and excellence.

The Spring/Summer 2026 weaving collection includes a variety of wool blends and other natural fibres such as linen, mohair, viscose, silk, and crêpe yarns. Each material is chosen for its distinctive qualities. The collection also features yarns with technical properties for sports and functional fabrics, alongside a luxury line for accessories.

Crêpe and Crespini

Crêpe and Crespini yarns are characterised by their unique texture and wrinkle-resistant properties, offering an elegant appearance and a lightweight feel. Designed for refined summer fabrics, these yarns ensure comfort and a tailored fit. Flagship of this line is the **CRS Tenda ECO Nm 120/2 S 1200 Crespino**. Composed of 85% high-quality wool (19.3 μ) and 15% Q-NOVA® recycled polyamide, it is offering a unique texture and eco-friendly benefits. Its fine wool ensures softness and breathability, while the recycled polyamide enhances durability and sustainability, making it ideal for a variety of summer applications.

Super S

Super S yarns represent combed wool excellence, combining softness and durability. Made with superfine wool, these yarns offer a smooth finish and natural sheen, ensuring a sophisticated look and long-lasting quality ideal for high-quality fabrics. One standout option of this new collection is the **Janus RWS Nm 60/1 Z 780 X-COMPACT** composed of 100% superfine wool (17.2 μ). This yarn is Responsible Wool Standard (RWS) certified, ensuring ethical and sustainable sourcing. Due to the X-COMPACT spinning technique, this yarn is less hairy, more elastic, and more durable. With its fine wool composition, it offers softness and comfort, making the yarn ideal for luxurious fabrics and high-end fashion applications.

Shades of Mohair

With their sheen and softness, Mohair yarns add a touch of luxury and refinement to any fabric. Thanks to their natural moisture-wicking properties, these yarns keep the skin dry and comfortable even on summer days, making them ideal for summer clothing. The **Oropa RMS Nm 32/1 Z 600** yarn, embodying the synergy of modernity and prestige, is composed of 86% Super Kid Cape Mohair (RMS certified) and 14% premium linen. With its structure, this yarn offers an exquisite blend of softness and strength, making it ideal for high-end fabrics.

Summer vibes

The summer vibes yarns are perfect for the warmer months, featuring blends of wool, silk, and linen. These yarns combine the lightness and breathability of linen, the luxurious feel of silk, and the natural moisture-wicking properties of wool, making them ideal for creating comfortable and stylish summer fabrics, just like the **SRP Gallipoli TOP Nm**

74/2 S 800 composed of 83% high-quality wool (17.2 μ) and 17% premium linen. The blend with linen creates an unique three-dimensional effects, adding a sophisticated touch to any design, and making it ideal for creating elegant and refined summer fabrics.

ACTIVEYARN®

ACTIVEYARN® yarns are designed to provide performance fabrics that make them ideal for the production of sports performance garments. Thanks to state-of-the-art technical spinning solutions, these yarns guarantee exceptional performance, perfectly supporting physical activities and movement even in everyday wear. **Stelvio Nm 100/1 Z 900 Betaspun®** consists of 84% Total Easy Care treated 16.2 μ wool, 11% polyamide filament and 5% elastane. Thanks to its structure, this yarn offers a unique combination of softness, elasticity and strength. The Betaspun® spinning technology improves performance by offering exceptional comfort, toughness and resistance to abrasion and pilling.

Accessories

Luxury accessory yarns are designed for fabrics with a precious touch. Made from blends of wool and fine fibres such as cashmere and silk, these sophisticated yarns are perfect for creating elegant and distinctive accessory fabrics. The **Lerici RWS Nm 60/1 Z 620** fully represents this line, as it is composed of 70% RWS-certified 19.5 μ wool and 30% silk.
