

PRESS RELEASE**Suedwolle Group presents Fall/Winter 2027/2028 weaving yarn collection****Merging tradition and innovation for authentic and long-lasting pieces**

Nuremberg – February 2026 – Suedwolle Group unveils its Fall/Winter 2027/2028 weaving yarn collection, a season dedicated to longevity, material integrity, and meaningful innovation. Designed for weavers, brands, designers and everyone engaged in the craft of textile creation, the collection invites to take a moment to appreciate yarns that tell a story over time. Organised into clear themes, it offers both inspiration and practical direction in the evolving language of contemporary textile.

Precious: Elegance that remains

Within *Precious*, Suedwolle Group honours the time, care and craftsmanship needed for creating luxurious blends with noble fibres. This selection includes yarns such as *Amiata* Nm 16/2 S 220 (100% Alpaca Suri) for bright and warm pile fabrics, and *Candelo RMS RWS* Nm 40/1 / Nm 40/2 / Nm 40/3 (50% Wool 19.3 μ RWS, 40% Super Kid Cape Mohair RMS, 10% Cashmere) for elegant fabrics with a bright and fluid drape. A unique offer that reflects the company's longstanding expertise in premium fibre spinning.

Utility: Wool for contemporary wear

The *Utility* theme draws inspiration from everyday clothing and translates it into a curated collection of wool-blended yarns, carefully engineered for pieces made to be lived with. *Banda TEC* Nm 37/2 / Nm 37/3 X-COMPACT® (100% Wool 17.2 μ TEC) - the ultimate protagonist of our upcoming Innovation Hub story - brings a refined wool-based interpretation to denim fabrics, allowing multiple weights and applications.

Following this direction, *Mayon* Nm 36/2 S 480 (40% Wool 20.3 μ TEC, 60% LENZING™ Lyocell) delivers a cooler and more fluid touch by blending wool with lyocell. Thought for everyday use, *Utility* offers yarns that are versatile and ideal also for shirts and jackets. The quality yarn *Shirtwool* Nm 60/1 X-COMPACT® (100% Wool 17.2 μ TEC) is the perfect choice for a refined look with a soft handfeel.

Essence: Meaningful balance

The *Essence* capsule balances classic designs and current trends and explores the versatility of wool yarns using advanced spinning solutions. *BigRock Betaspun® RWS* Nm 60/1 (87.4% Wool 18.4 μ TEC, 12.6% Polyamide Filament GRS Black) plays with the rhythm of colours and surfaces in a reinterpretation of traditional jaspé, in which wool spun with a black polyamide filament for structure, abrasion resistance and colour effect. *Nativo GOTS* Nm 2.000 (75% Wool 19,5 μ GOTS 25% Alpaca) introduces a fancy yarn with a rich and expressive wool-alpaca blend for a soft hand feel and authentic look.

Seasonal yarn highlights

The highlights section showcases blends selected for their brilliance, lightness, and character. *M148 RMS Nm 22.6/1 X-COMPACT®* (100% Kid Cape Mohair RMS) delivers a clear, luminous mohair character. Among the new introductions, *Courchevel RMS SFA Nm 40.5/1 X-COMPACT®* (90% Super Kid Cape Mohair RMS, 10% Cashmere SFA) brings a soft, elevated luxury touch, while *Chamois RMS Nm 22.6/1 X-COMPACT®* (80% Kid Mohair RMS, 20% Mulberry Silk) offers a bright look with smoother handfeel. The theme is rounded off by *Crespini* for surf aces with a crisp character. *CRS Tonale Nm 100/2* (84% Wool 19.3 µ, 16% Silk Filament) combines natural components to create a yarn that unites lightness, strength, and elegance.

SWLab: A look into tomorrow's yarn ideas

Suedwolle Group continues with its research project SWLab, a dedicated space for showcasing the most exploratory stages of yarn development within Suedwolle Group's weaving segment. It offers a look into techniques and fibre combinations aimed at contemporary and future applications. Produced in small editions, this exclusive research can only be viewed at trade shows and during business meetings, as it is intentionally crafted as a tactile object with the purpose of creating a more personal, hands-on experience.

With this collection, Suedwolle Group underscores its ongoing commitment to connecting tradition with progress. The Fall/Winter 2027/2028 collection offers designers and creators a foundation for building enduring, character-rich pieces.
